

Kangaroo Island

Australia's 3rd largest island, situated off the coast of South Australia, has a rural setting with 25% of the land devoted to National Parks and reserves. Many of the feral animals, such as rabbits, have not been introduced to the island, therefore the natural habitat is in pristine condition.

Spectacular coastal scenery is coupled with a European history dating to the 1820s. From our base camps the bushwalks take us through some of the best areas at Flinders Chase and Kelly Hill.

Also included are visits to the seal colony, Kelly Hill Caves, Kingscote, American River and some iconic lighthouses. Fares are ex-Adelaide and include ferry charges.
